D. Amendment to the Claims

The listing of all claims in the application is provided.

(Currently Amended) A reflection mirror comprising:
a resin substrate;

an underlaying layer formed on the resin substrate, the underlaying layer including at least one TiO₂ film and at least one Al₂O₃ film, wherein a film of the underlaying layer contacting the resin substrate is a TiO₂ film;

a reflection layer composed of an Ag film formed on the underlaying layer; and

a protective layer formed on the reflection layer, the protective layer including at least one TiO₂ film and at least one Al₂O₃ film,

wherein each of the underlaying layer and the protective layer is composed of alternating layers of a TiO₂ film and an Al₂O₃ film,

wherein a film of the underlaying layer contacting the resin substrate is a <u>TiO₂ film, and</u>

wherein a film of the underlaying layer contacting the reflection layer is a TiO₂ film.

2-3. (Cancelled)

4. (Original) A reflection mirror according to claim 1, wherein a geometric total film thickness of the Al₂O₃ films included in the underlaying layer is 10 nm or more.

- 5. (Original) A reflection mirror according to claim 4, wherein a geometric total film thickness of the Al_2O_3 films included in the underlaying layer is 100 nm or less.
- 6. (Original) A reflection mirror according to claim 1, wherein a geometric film thickness of the TiO₂ film of the underlaying layer contacting the resin substrate is 80 nm or less.
- 7. (Original) A reflection mirror according to claim 1, wherein the protective layer further includes a film of SiO_x (1<x<2) having a geometric film thickness of 1 to 20 nm.
- 8. (Currently Amended) A reflection mirror according to claim 1, wherein the underlaying layer is composed of 2 layers of a TiO₂ film and an Al₂O₃ film; 3 layers of selected from the group consisting of (i) a combination of a TiO₂ film, an Al₂O₃ film, and a TiO₂ film; 4 layers of a TiO₂ film, an Al₂O₃ film, a TiO₂ film, and an Al₂O₃ film; or 5 layers of and (ii) a combination of a TiO₂ film, an Al₂O₃ film, a TiO₂ film, an Al₂O₃ film, and a TiO₂ film, in order from the resin substrate side.
- 9. (Currently Amended) A reflection mirror according to claim 1, wherein the protective layer is composed selected from the group consisting of (i) a combination of 2 layers of an Al₂O₃ film and a TiO₂ film; 4 layers of (ii) a combination of an Al₂O₃ film, a TiO₂ film, an Al₂O₃ film, and a TiO₂ film; 3 layers of (iii) a combination of

a TiO_2 film, an Al_2O_3 film, and a TiO_2 film; 5 layers of a (iv) a combination of TiO_2 film, an Al_2O_3 film, a TiO_2 film, and a TiO_2 film; or 3 layers of an (v) a combination of Al_2O_3 film, a TiO_2 film, and an SiO_x (1<x<2) film, in order from the resin substrate side.

- 10. (Original) An optical member comprising the reflection mirror of claim 1.
- 11. (Original) An optical equipment comprising the optical member of claim 10.
- 12. (New) A reflection mirror according to claim 1, wherein the resin substrate is a polycarbonate substrate.
- 13. (New) A reflection mirror according to claim 8, wherein the resin substrate is a polycarbonate substrate.
- 14. (New) A reflection mirror according to claim 9, wherein the resin substrate is a polycarbonate substrate.
